RIGHT SKILLS = UPWARD TRAJECTORY FOR GROWTH

- As companies move to leaner teams, the demand for full stack developers has increased by 20 per cent in 2019
- Business Standard
- A full-stack engineer can earn 30 percent more than a regular developer depending on the experience level
- Ace Web Academy
- Entry-level AI role can command a 70 percent+ premium over that of a plain Computer Science (CS) Engineer
- Economic Times
- Demand for skills such as creativity, critical thinking and decision making, and complex information processing will grow through 2030 at double-digit rates
- Weforum.org
- Data engineering is a top tech job with 88.3 percent increase in posting in 2019
- Dice
- The skills needed to get a job will change by 2020
- Weforum.org

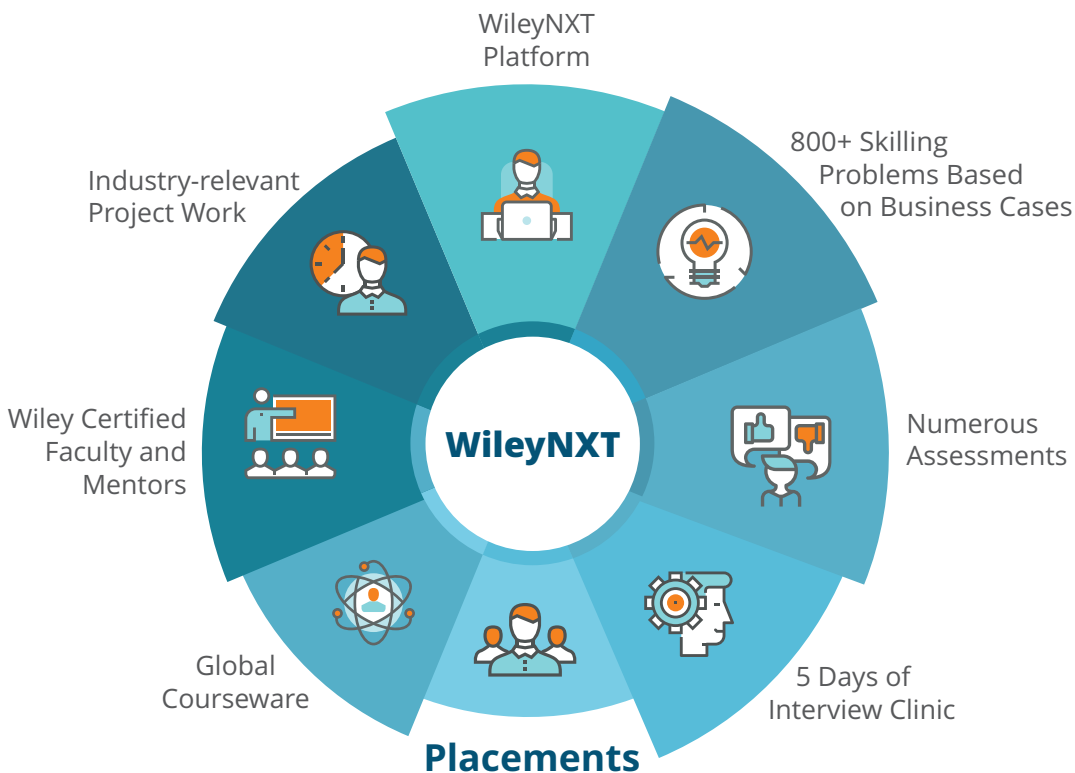

TRANSFORM YOUR CAREER WITH **WileyNXT** University PROGRAM

A **372+ hours** immersive learning program that helps you

- Build critical job-ready skills
- Master conceptual 'know-how' and demonstrate contextual 'show-how' skills
- Get placed in top tech companies

Learn Every Skill You Need to Get Hired

Co-created by Wiley, a global leader in education with 40+ top CXOs and thought leaders of Wiley Innovation Advisory Council (WIAC)*

*See page 10 for more information or visit www.wileyinnovationcouncil.com

How Can You Take the WileyNXT Programs?

Model 1: Accelerator Program

What your daily training schedule will include:

- 2 Hours: Concept Building Sessions by WileyNXT Certified Trainers
- 4-5 Hours: Hands-On Problem Solving Sessions, Mini-Projects
- Additional Hours: Additional Projects, Code Challenges

Also includes:

- End of Course Examinations after each module
- Capstone Collaborative Projects
- Final Certification Examination

**The More You Practice,
The Better You Become!**

Model 2: 3-Year Integrated Program

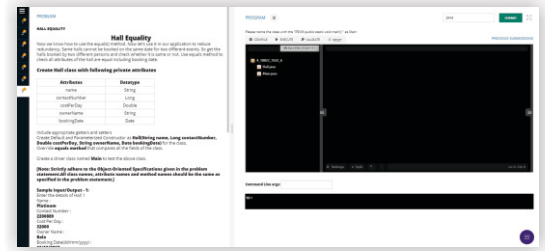

What Your 3-Year Integrated WileyNXT Experience Will Include:

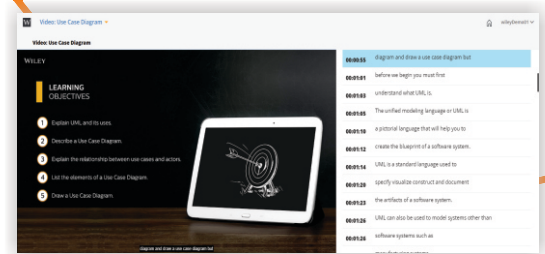

- 10+ Modular Courses with Online Learning resources
- 800+ practice skilling problems
- Capstone Collaborative Projects, Additional Projects, Code Challenges
- Interview Clinic

ENGAGE AND LEARN WITH THE WileyNXT PLATFORM

A Highly Interactive Approach to Learn, Practice and Assess

- ✓ Get 250+ hours of rigorous, hands-on practice
- ✓ Learn from hundreds of world-class videos
- ✓ Build real collaborative team projects
- ✓ Engage in competitive projects, gamified projects and code challenges

Outcome = Be Multi-skilled,
and Fast-track Your Career Growth

Technical Competencies
*Front-end, Server Side,
Database, Testing, Algorithms*

**Your Pathway to
Become a Supercoder**

Problem-Solving Mindset
*Curious, Motivated, Critical
Thinker, Collaborative, Confident,
High Learnability Quotient*

Business Proficiencies
*Design Thinking, Agile,
Customer-Centric, Business
Context Understanding,
Focus on Application*

THE WileyNXT DIFFERENTIATOR

Up-to-Date Curriculum
*Developed by 40+
leaders of Wiley
Innovation
Advisory Council*

WileyNXT Platform
*Cutting edge platform
that integrates
learning, skilling and
assessment*

Global Courseware
*Developed by top
global experts and
learning designers*

Key challenges we are dealing with today

What would be the impact of exponential technologies on businesses across industries?

How can industry and academia collaborate to build effective learning frameworks and curricula for new age job roles of the digital economy?

What can be the strategy towards building a continuous cycle of talent that remains constantly relevant?

Evolution of Wiley Innovation Advisory Council (WIAC)

In context of these problem statements, the only way to arrive at an effective solution is by bringing in thought leaders from both industry and academia together and engaging in discussions and collaborations that lead to concrete outcomes.

With this intent in mind, Wiley conceptualized the Wiley Innovation Advisory Council (WIAC) as a forum of top influencers, thought leaders, business leaders and industry experts willing to contribute towards the Future of Work and Future of Learning.

The contributions and initiatives of WIAC are a step towards helping learners, professionals, institutes and organizations prepare best for Industry 4.0.

"I was shocked that after 4 days of training and being on the platform the confidence level of the students greatly enhanced...they personally came up to me and said they were now passionate about coding."

— **Gurucharan Singh**
Training and Placement Officer,
New Horizon College of Engineering

The Journey so far...

InnovationNxt discussion at WGIC'19

Fostering a platform for exchange of industry insights, perspectives and trends in exponential technologies

Panel discussion organized by Bridgei2i

Evangelizing innovation and thought leadership through publications such as the Wiley Innovation Black Book on Exponential Technologies 2019

Launch event of Wiley Innovation Black Book on Exponential Technologies 2019 with Peter Wiley

Glimpse of WileyNXT online learning platform

Building industry-focused learning frameworks through WileyNXT for developing skilled future-ready workforce to bridge the talent gap

WCJFSD

Wiley Certified Java Full Stack Developer

The IT and Tech industry slated the IT sector to grow to \$350 billion by 2025. This growth, driven by the push towards digital products, would need skilled developers who can take ownership of projects and create products end-to-end

Outcome of the Program

- Develop Foundation in Software development and Agile Practices
- Demonstrate proficiency in solving problems using Data Structures and Algorithms
- Become proficient in programming a browser (like using JavaScript, jQuery), a server (using Java), a database (using SQL)
- Sharpen the skills of using HTML5, CSS3 and JavaScript, tools
- Gain mastery in Front-end and Back-end application frameworks
- Gain expertise in advanced Java application framework
- Enhance your employability by showcasing skills in structuring, design, implement and testing in Java via multiple projects

CURRICULUM

Module 1: Module 1 Software Engineering

Module 2: DevOps Basics

Module 3: Cloud Foundations

Module 4: Structured programming in Java

Module 5: Core java

Module 6: Working with SQL

Module 7: Web technologies

Module 8: Web App Development

Module 9: Java Frameworks

Module 10: Maven & Jenkins

**Program can be customized to fit specific curricular requirements*

Prerequisites:

- Basic coding and programming skills is desirable
- Math aptitude

Micro-learning courses on 21st Century Skills

Design
Thinking

Product
Management

Agile

User
Experience

WCDE

Wiley Certified Data Engineer

Build your skills in the full Data Engineering stack

According to NASSCOM the Indian Big Data and Analytics Industry is expected to grow to \$16 billion, by 2025. The industry will need skilled workforce to build the Big Data infrastructure applications and platforms (e.g technologies like Hadoop & Spark) to support this growth

Outcome of the Program

- Demonstrate proficiency in processes involved in managing and analyzing massive data sets.
- Develop foundation in data structures and algorithms
- Acquire skills to perform batch processing operations, retrieve and store data in HDFS & Hbase using MapReduce
- Develop expertise in using tools to ingest structured and unstructured data into big data processing systems
- Gain proficiency in using Hive to perform data transformations.
- Become confident in managing workflows with OOZIE
- Develop basic programming skills in Spark and Scala
- Acquire the capability to applying core data engineering concepts to carry out realworld projects d also
- Enhance your employability by showcasing data engineering skills in real world prohects

CURRICULUM

Module 1: Structured Java

Module 2: MySQL

Module 3: OOPs Java

Module 4: Web Technologies

Module 5: Front End Frameworks

Module 6: Big Data Fundamentals

Module 7: Hadoop and MapReduce

Module 8: Advanced Hadoop

Module 9: Pig and Hive

Module 10: NoSQL

Module 11: Spark

Prerequisites:

- Basic coding and programming skills is desirable
- Math aptitude

Micro-learning courses on 21st Century Skills

Design
Thinking

Product
Management

Agile

User
Experience

**Program can be customized to fit specific curricular requirements*

WCMLS

Wiley Certified Machine Learning Specialist

Build your skills in the full Machine Learning stack

The World Economic Forum predicts that the growth of artificial intelligence would create 58 million net new jobs in the next few years. This future will be built on Artificial Intelligence and Machine Learning Learning Skills

Outcome of the Program

- Develop foundation in data structures and algorithms
- Develop proficiency in, data cleaning and data manipulation techniques using Python.
- Develop ability to independently solve business problems using ML
- Master Predictive Modelling techniques such as linear and logistic regression
- Develop capability to solve segmentation -based business problems using K-Means and Hierarchical clustering
- Become proficient in handling text-based data using Natural Language processing
- Acquire skills to solve complex problems using neural networks
- Master the art of storytelling and data visualisation to build charts and dashboard and present meaningful insights to the management.
- Enhance your employability with a verified portfolio with multiple projects that will showcase the skills acquired

CURRICULUM

Module 1: Structured Java

Module 2: MySQL

Module 3: OOPs Java

Module 4: Web Technologies

Module 5: Front End Frameworks

Module 6: Big Data Fundamentals

Module 7: Hadoop and MapReduce

Module 8: Advanced Hadoop

Module 9: Pig and Hive

Module 10: NoSQL

Module 11: Spark

Prerequisites:

- Basic coding and programming skills is desirable
- Math aptitude

Micro-learning courses on 21st Century Skills

**Program can be customized to fit specific curricular requirements*

Validate Your Skills with Wiley Certification

WILEY – THE GLOBAL LEADER IN LEARNING SOLUTION

200 years
of excellence

470+ Nobel
Laureates

Global Presence

Serving Learners

Leveraging technology and content-enabled solutions to drive the knowledge economy

EDUCATION

Improve Access and Outcomes

- 2800+ courses
- 527,000 students
- 179+ university partners
- 222+ online programs

Enabling Reskilling and Upskilling

- 40 million personality assessment end-users
- 6 million platform end-users
- 20,000 learning objects
- 4000 global experts

EMPLOYMENT

Accelerate Discovery, Validation

- 1600 journals
- 226 million full text downloads per year
- 1200 society partners
- 15 million member researchers

Wiley drives the world forward with research and education. Through publishing, platforms and services, we help students, researchers, universities, and corporations to achieve their goals in an ever-changing world. For more than 200 years, we have delivered consistent performance to all of our stakeholders.

Visit www.wileyonlinelibrary.com and www.wiley.com to know more.

"The WileyNXT program helped me enhance my coding skills. The videos helped me learn the concepts. The hands-on learning provided through the challenges is very innovative and an interesting way to learn coding. This improved our thinking ability as well."

— Aditi Sinha, ISE Dept

"I was never good at coding but now WileyNXT platform has given me the confidence and this has changed my life. Companies require knowledge of these concepts and the WileyNXT platform has helped me achieve that."

*— Aarthi Kannan, CS Dept,
New Horizons College*
